Week 3 – Day 1: AI Tools Project Brief

Project Focus

Today, you will begin working individually on a short research project or article using AI tools to support your work. This is your chance to apply what you've learned — using AI responsibly while showing your own original thinking.

Choose One of These Project Types

- 1. Research Brief (1-2 pages) on a Political Science Topic
- 2. Blog-style Article for Social Media Awareness
- 3. Presentation Outline for a Campaign or Advocacy Topic

Suggested Topics

- How AI is Affecting Elections in Africa
- The Impact of Social Media Algorithms on Political Polarization
- AI and Data Privacy Laws in Ghana
- Technology and Fake News: Combating Misinformation
- Challenges of Regulating AI in Politics
- The Role of AI in Public Policy Making
- The Future of Digital Democracy

AI Tools You Can Use

- ChatGPT – for generating ideas, outlines, and drafts
- QuillBot – for paraphrasing and improving clarity
- ExplainPaper / Consensus – for summarizing academic papers
- Canva – for creating a simple infographic or supporting graphic (optional)

Instructions

Work individually. Use AI tools to support your work but avoid copy-pasting entire outputs without adding your own analysis or critical thinking.

Save your progress. You'll continue refining and presenting your work in the next session.
